## LOCATION

Our office and nursery are located on the Bedford-Concord Road, Route 62, one mile from Bedford Center and three and one-half miles from Concord. To reach us from Boston, which is 15 miles distant, drive through Arlington, thence through Lexington to Bedford. From Lowell which is 12 miles distant, drive through Billerica to Bedford. Motor Busses from Arlington Heights to Concord, via Bedford, pass the nursery at frequent intervals.

Purchasers should state plainly the mode of conveyance by which stock should be forwarded. Otherwise we exercise our judgment, For delivery by motor truck, a cartage charge will be made in accordance with size of load and distance to be hauled.

All prices given are for the stock at the nursery, and freight or express charges are payable by customer.

In the Nursery we have of course, many plants larger than those listed and many of a smaller size, also in the Evergreens there are plants that are not symmetrical enough to be used as specimens, but which are perfectly good otherwise. Such stock is priced in accordance with its value. A visit to the Nursery is well worth while if you need stock for a particular need.

Write or call on us for sizes and varieties not listed. If we cannot furnish them we can undoubtedly recommend a reliable source.

---

## EVERGREENS

The term "Evergreen" is given to that group of trees, shrubs and plants retaining their leaves throughout the year. They range in size from the massive White Pines, Spruces and Hemlocks which grow to a height of 75 to 100 feet and taller, down to the lowest growing perennials, some of which are not more than 1 inch high when fully grown.

In making an Evergreen planting it is very necessary that suitable varieties be used if the proper effect is to be had. For instance tall growing Pines and Spruces should never be used as a foundation planting as they will soon become too large and have to be removed. And some of the very dwarf perennial Evergreens are best suited in a rock garden, or under large trees in dense shade.

To help those who are not familiar with the various types of Evergreens, we have divided them into three groups. The first is that of tall growing trees, suitable for specimen planting on lawns, as windbreaks and screens, reforestation, and grouping for landscape effect where space permits. The second is made up of the best varieties for use as foundation planting around homes, for grouping in corners of the lawn or in any space where a spot of green is wanted throughout the year and the space is limited. The third is mostly the broadleaved plants such as Rhododendrons, Mt. Laurel, etc., the Heathers and Evergreen Euonymus. Many of these may be included in plantings of the preceding group, and in addition to being Evergreens, some bear beautiful flowers. Most of this group like a shady situation, and some of them require it to be at their best.

### Group I

#### Tall Growing Evergreen Trees.

|  | Each   |
|--|--------|
| <b>Fir</b> ( <i>Abies</i> ). Good for lawn specimens, etc. |        |
| <b>Concolor.</b> Blue fir. 18 to 24 in. ....               | \$1.50 |
| 2 to 3 ft. ....  | 2.00   |
| <b>Fraseri.</b> Silvery balsam fir. 2 to 3 ft. ....        | 2.00   |
| 3 to 4 ft. ....  | 3.00   |
| 5 to 6 ft. ....  | 4.00   |
| <b>Douglas</b> ( <i>Pseudotsuga</i> ). Western fir.        |        |
| Soft foliage. 3 ft. ....                                   | 2.00   |
| 4 to 6 ft. ....  | 3.00   |
| <b>Hemlock</b> ( <i>Tsuga canadensis</i> ). Native hamlock |        |
| 3 to 4 ft. ....  | 3.00   |
| 4 to 5 ft. ....  | 4.00   |

|  |      |
|--|------|
| <b>Pine</b> ( <i>Pinus</i> ). Useful for windbreaks, specimens, etc.   | Each |
| <b>Austrian</b> ( <i>Nigra</i> ). Long stiff needles   |      |
| 3 to 4 ft. ....  | 2.00 |
| 5 to 6 ft. ....  | 3.00 |
| <b>Norway or Red</b> ( <i>Resinosa</i> ).  |      |
| 3 to 4 ft. ....  | 2.00 |
| 4 to 5 ft. ....  | 2.50 |
| <b>Scotch</b> ( <i>Sylvestris</i> ). Fast growing. 2 to 3 ft. ....   | 1.00 |
| <b>White</b> ( <i>Strobus</i> ). Our native pine. 2 to 3 ft. ....  | 1.50 |
| 3 to 4 ft. ....  | 2.00 |
| 4 to 6 ft. ....  | 2.50 |
| <b>Spruce</b> ( <i>Picea</i> ). The spruces are very popular, both as specimens and for windbreaks, hedges, etc. |      |
| <b>Colorado.</b> ( <i>Pungens</i> ). Bluish green foliage.   |      |
| 2 ft. ....   | 2.00 |
| 3 ft. ....   | 2.75 |
| 4 ft. ....   | 3.25 |
| <b>Colorado blue.</b> Selected for their blue color.   |      |
| 2 ft. ....   | 3.00 |
| 3 ft. ....   | 4.00 |
| 4 ft. ....   | 5.00 |
| <b>Norway</b> ( <i>Excelsa</i> ). The most commonly planted variety.   |      |
| 2 to 3 ft. ....  | 1.25 |
| 3 to 4 ft. ....  | 2.00 |
| 5 to 6 ft. ....  | 3.00 |
| <b>White</b> ( <i>Canadensis</i> or <i>alba</i> ). Bluish green, short needles.                                  |      |
| 18 to 24 in. ....  | 1.25 |
| 2 to 3 ft. ....  | 1.75 |
| 3 to 4 ft. ....  | 2.00 |
| 5 to 6 ft. ....  | 3.00 |

## Group II

Dwarf and medium tall growing evergreens. This group contains a list of the most hardy and satisfactory evergreens for foundation plantings.

**Arborvitae** (*Thuja*). This variety in its many forms is more widely planted in New England than any other, and succeeds under almost all conditions. It is commonly known as Cedar.

**American** (*Occidentalis*). The common native variety. Generally sheared and much used for hedges and windbreaks.

|                 |      |
|-----------------|------|
| 2 to 3 ft. .... | .100 |
| 3 to 4 ft. .... | 1.50 |

|  |      |
|--|------|
|  | Each |
| 4 to 5 ft. ....  | 2.00 |
| 5 to 6 ft. ....  | 3.00 |
| <b>Globe</b> (Globosa). A globe shaped dwarf variety. Bright green.  |      |
| 12 to 15 in. ....  | .75  |
| 15 to 18 in. ....  | 1.25 |
| 18 to 24 in. ....  | 2.00 |
| <b>Hovey</b> (Hoveyi). Light green fan shaped branches.  |      |
| 15 to 18 in. ....  | 1.00 |
| 18 to 24 in. ....  | 1.50 |
| 2 to 3 ft. ....  | 2.00 |
| <b>Golden</b> (Lutea). A bright yellow upright arborvitae.   |      |
| 18 to 24 in. ....  | 1.00 |
| <b>Plicata or elegantissima</b> . A thick leaved open pyramidal shaped plant with yellowish white tips. 18 to 24 in. ....                                |      |
| 2 to 3 ft. ....  | 1.50 |
| <b>Pyramidal or pyramidalis</b> . A slender pyramidal tree of beautiful green. Indispensable in any foundation planting.                                 |      |
| 18 to 24 in. ....  | 1.00 |
| 2 to 3 ft. ....  | 1.50 |
| 3 to 4 ft. ....  | 2.00 |
| 4 to 5 ft. ....  | 2.50 |
| <b>Siberian</b> (Wareana). A very dark green thick leaved variety. broadly pyramidal.  |      |
| 18 to 24 in. ....  | 1.00 |
| 2 to 3 ft. ....  | 1.50 |
| <b>Variegated</b> . (Vervaeneana). Bright yellow and green foliage.  |      |
| 18 to 24 in. ....  | 1.00 |
| 2 to 3 ft. ....  | 1.25 |
| 4 to 5 ft. ....  | 3.00 |
| <b>Woodward's</b> (Woodwardi). A dark green globe.   |      |
| 15 to 18 in. ....  | 1.25 |
| 18 to 24 in. ....  | 2.00 |
| 2 to 2½ ft. ....   | 2.50 |
| <b>Cypress</b> (Chamaecyparis). Thread leaved Japanese (Filifera. Drooping stringy foliage. Good green.  |      |
| 2 to 3 ft. ....  | 2.25 |
| <b>Hemlock</b> (Tsuga). The common Hemlock may be used for planting among dwarf evergreens. Those having two or more stems are best, and may be sheared. |      |
| 12 to 18 in. ....  | .75  |

|  |              |
|--|--------------|
|  | Each         |
| 18 to 24 in. ....  | 1.50         |
| 2½ to 3 ft. ....   | 2.00         |
| 3 to 4 ft. ....  | 3.00         |
| <b>Juniper</b> ( <i>Juniperus</i> ). This family consists of many tall growing as well as spreading types. A few of the better are listed. |              |
| <b>Golden</b> ( <i>Communis aurea</i> ). A bright yellow form of the common spreading juniper.   |              |
| 15 to 18 in. ....  | 1.50         |
| 2 to 3 ft. ....  | 2.00         |
| <b>Irish</b> ( <i>Hibernica</i> ). A dense, narrow very formal tree growing about 8 feet tall.   |              |
| 18 to 24 in. ....  | 1.00         |
| 2½ to 3 ft. ....   | 1.50         |
| 4 ft. ....   | 2.00         |
| 5 to 8 ft. specimens ....  | 3.00 to 5.00 |
| <b>Greek</b> ( <i>Excelsa stricta</i> ). Bright green.   |              |
| 15 to 18 in. ....  | 1.50         |
| <b>Needle</b> ( <i>Rigida</i> ). Upright open growth, bright green.  |              |
| 18 to 24 in. ....  | 1.00         |
| 2 to 3 ft. ....  | 1.50         |
| 3 to 4 ft. ....  | 2.00         |
| 4 to 6 ft. ....  | 3.00         |
| <b>Pfitzer's</b> ( <i>Pfitzeriana</i> ). One of the best of the spreading types. Bluish green foliage.                                     |              |
| 12 to 18 in. ....  | 1.25         |
| 2 ft. ....   | 1.75         |
| 2½ to 3 ft. ....   | 3.00         |
| 3 to 4 ft. ....  | 5.00         |
| <b>Red Cedar</b> ( <i>Virginiana</i> ). Grows wild on hillsides. Makes large tree, but can be kept sheared.                                |              |
| 2 to 3 ft. ....  | 1.50         |
| 3 to 4 ft. ....  | 2.00         |
| 4 to 5 ft. ....  | 3.00         |
| <b>Savin</b> ( <i>Sabina</i> ). Dark green spreading variety.  |              |
| 12 to 15 in. ....  | 1.00         |
| 18 in. ....  | 1.50         |
| 24 in. ....  | 2.00         |
| 3 ft. ....   | 3.00         |
| <b>Tamarix savin</b> ( <i>Tamarisifolia</i> ). Dark green, a low trailing variety.   |              |
| 18 in. ....  | 2.00         |

Each

**Waukegan** (*Horizontalis douglasi*). A low trailing juniper, blue in color. Good on banks or as a ground cover.

18 to 24 in. .... 1.50

**Pine** (*Pinus*). Low growing or dwarf varieties.

**Mountain pine** (*Montana*). Makes a good specimen or may be used in groups.

3 to 4 ft. .... 3.00

**Dwarf Mt. pine** (*Mughus*). Very hardy and popular.

15 to 18 in. .... 1.50

18 to 24 in. .... 2.00

**Spruce** (*Conica Glauca*). Dwarf Alberta spruce.

12 to 15 in. .... 2.50

**Yew** (*Taxus*). The yews are extremely hardy and thrive best in a shady situation.

**Canadian** (*Canadensis*). Common native yew. Low spreading.

15 to 18 in. .... 2.00

**Japanese** (*Cuspidata*). Very dark green, spreading, often with red berries through Fall and Winter. One of the best dwarf Evergreens.

15 to 18 in. .... 2.00

18 to 24 in. .... 2.25

2 to 2½ ft. .... 3.50

**Capitata**. The upright form of the Japanese Yew. Broadly pyramidal in shape. Makes a beautiful hedge.

15 to 18 in. .... 1.50

2 to 2½ ft. .... 3.00

2½ to 3 ft. .... 4.00

**Nana**. Dwarf Japanese Yew. Very slow in growth. Dark green, compact and bushy. 12 to 15 in. .... 2.50

**Hicksi**. (Hick's yew). Columnar in growth, darkest green, perhaps most beautiful of all the yews, where formal effect is desired. 12 to 15 in. .... 1.50

15 to 18 in. .... 2.00

### Group III

Plants in this group may be used with those in the preceding where soil and conditions are favorable to their growth.

**Heather** (*Calluna*). White and pink flowering, also golden leaved plants. Low growing and good in rock garden. .... .35  
Red flowering ..... .50

**Garland flower** (*Daphne cneorum*). Rose daphne. Low growing evergreen plant with clusters of pink and very fragrant flowers

|   |       |
|---|-------|
|   | Each  |
| in Spring and again in Fall. 6 to 8 in. ....  | .50   |
| <b>Euonymus.</b> Evergreen vines in two year old plants .....   | .50   |
| <b>radicans.</b> Small leaved variety, not particularly hardy.  |       |
| <b>colorata.</b> Fastest growing variety useful for ground cover. Leaves turn red in Fall.  |       |
| <b>vegetus.</b> Large leaved variety. Clings to stone or wood.  |       |
| <b>Mountain Laurel</b> ( <i>Kalmia latifolia</i> ). Well known native shrub with clusters of white or pink flowers. 15 to 18 in. ....                   | 1.25  |
| 18 to 24 in. ....   | 1.50  |
| <b>Leucothoe catesbaei.</b> A small evergreen with long glossy leaves on slender drooping branches. 12 to 18 in. ....                                   | 1.00  |
| 2 ft. ....  | 1.50  |
| <b>Pachysandra terminalis</b> (Japanese spurge). A fast spreading ground cover growing about 1 foot high. Per 100 .....                                 | 15.00 |
| <b>Pieris floribunda.</b> Lily of Valley shrub. Olive green leaves with creamy white flowers in early Spring.   |       |
| 15 to 18 in. ....   | 1.50  |
| 18 to 24 in. ....   | 2.00  |
| <b>Rhododendron Catawbiense.</b> The most widely planted variety, with large red to reddish purple flowers. Very hardy.                                 |       |
| 18 to 24 in. ....   | 2.00  |
| 2 to 2½ ft. ....  | 3.00  |
| 2½ to 3 ft. ....  | 4.00  |
| <b>Maximum or Great Bay.</b> Largest growing variety with white or pink flowers. Long green leaves. 2 to 3 ft. ....                                     | 2.50  |
| 3 to 4 ft. ....   | 4.00  |
| <b>Yucca filamentosa</b> (Spanish bayonet). A tropical looking plant about 1 foot tall, sending up a flower stalk 6 to 8 ft. Creamy white flowers. .... | .25   |

## ROSES

From the long and ever increasing list of Roses, we have selected the following varieties as being particularly adapted for those who have a small or medium garden. They require a minimum of attention, will furnish an abundance of flowers in a good range of colors, and are all strong growers.

**We have made arrangements to supply nationally advertised patented roses direct from the growers, prepaid, at the established prices. Phone or leave your order with us. It will receive immediate attention.**

## HYBRID PERPETUAL

These are strong growing plants, flowering in June and generally

again in the Fall. They are the hardiest of the roses. Each ..... .60  
**F. K. Druschky**, large pure white.  
**General Jacqueminot**, scarlet crimson.  
**Magna Charta**, clear pink.  
**Mrs. John Laing**, large double pink.  
**Paul Neyron**, deep rose.  
**Prince Camille de Rohan**, dark crimson, fragrant.  
**Ulrich Brunner**, cherry red.

## HYBRID TEA

These are the everblooming roses, but require protection during the Winter. Each ..... .60  
**Ami Quinard**, deep crimson, fragrant.  
**Betty Uprichard**, salmon pink stained copper.  
**Betty Grace Clark**, cerise gold and yellow.  
**Etoile de France**, dark red.  
**Etoile de Holland**, dark red, very fragrant.  
**Gruss an Teplitz**, dark red, free flowering.  
**Hadley**, crimson, very fragrant.  
**K. A. Victoria**, pure white, very double.  
**Lady Hillingdon**, deep saffron yellow.  
**Luxemburg**, clear yellow.  
**Margaret McGredy**, red shading to gold, free flowering.  
**McGredy's Scarlet**, scarlet, orange base.  
**Mme. Jules Bouche**, large white.  
**Padre**, copper scarlet.  
**Pres. Hoover**, pink shading to scarlet and yellow.  
**Radiance Pink**, large pink flowers.  
**Radiance Red**, large red.  
**Roslyn**, golden yellow, large flowers.  
**Souvenir de Claudius Pernet**, clear yellow.  
**Sunburst**, intense orange and yellow.  
**Talisman**, copper red on yellow.

## CLIMBING AND RAMBLER ROSES

Each 50c

**American Pillar**, single rose carmine, white center.  
**Christine Wright**, bright pink.  
**Climbing American Beauty**, crimson.  
**Dorothy Perkins Pink**, clusters of pink flowers.  
**Dorothy Perkins White**, white, similar to the pink.  
**Dr. Van Fleet**, flesh pink, double.

**Excelsa**, an improvement on the Crimson Rambler.  
**Jacotte**, large semi-double, copper yellow.  
**Mary Wallace**, pink, similar to Dr. Van Fleet.  
**Mme. Gregoire Staechelin**, crimson buds, opening pink.  
**Primrose**, canary yellow, free flowering.  
**Silver Moon**, white, yellow center.

### BABY RAMBLER OR POLYANTHA ROSES

Each 50c

Flowers grow in clusters, and continue until frost. Plants grow from two to three feet and are excellent for borders.  
**Erna Teschendorff**, small bright rose pink.  
**Gruss an Aachen**, large flowers, light pink to salmon yellow.  
**Miss Edith Cavell**, brilliant scarlet.

### DECIDUOUS TREES

Shade Trees

Under this heading, we have listed those deciduous trees that are used for shade. The sizes given after each variety are those generally desired by the home owner, but larger trees can be furnished in most varieties. Call or write for prices on large specimens.

**Maples.** (Acer). The maples are the most popular shade trees, and are so well known that detailed description is unnecessary.

**Norway** (Platanoides). A large growing tree giving dense shade,  

Each

quite largely planted in cities. 8 to 10 ft. .... 2.00  
10 to 12 ft. .... 3.00  
2½ caliper ..... 5.00

**Norway red leaved** (Schwedleri). Leaves open red in Spring, changing to deep reddish green during season. 7 to 8 ft. .... 2.50  
8 to 10 ft. .... 3.00

**Sugar** (Saccharum). A beautiful shade tree with brilliant colored leaves in Autumn. 6 to 8 ft. .... 1.50  
8 to 10 ft. .... 2.25  
10 to 12 ft. .... 3.00

**Weir's cut leaf.** A fast growing maple with deeply cut leaves.  
10 to 12 ft. .... 2.00  
12 to 14 ft. .... 2.25

**White maple** (Rubrum). Our native swamp maple, at home both in wet or dry soils. 8 to 10 ft. .... 1.00  
10 to 12 ft. .... 2.00  
15 to 18 ft. 2½ to 3 in. caliper .....5.00

**Beech** (Fagus). Slow growing, smooth bark and many branches.

|  |      |
|--|------|
|  | Each |
| American. Our native Beech.  |      |
| 5 to 6 ft. ....  | 1.50 |
| 8 to 10 ft. ....   | 2.50 |
| <b>Rivers Purple.</b> Dark purple leaves.  |      |
| 4 to 5 ft. ....  | 7.00 |
| <b>Birch</b> (Betula). Birches are planted more for their white bark than for shade.   |      |
| <b>Cut leaf weeping</b> (Alba pendula gracilis). Finely cut leaves with drooping branches. A specimen tree. 6 to 8 ft. ....            | 2.25 |
| <b>White European</b> (Alba). A large growing birch with white bark.   |      |
| 8 to 10 ft. ....   | 2.00 |
| <b>Elm</b> (Ulmus). American. Our native Elm. 8 to 10 ft. ....   | 1.50 |
| <b>Chinese</b> (Pumila). Grows much faster than native Elm if in a favorable position. 8 to 10 ft. ....                                | 2.00 |
| <b>Larch</b> (Larix). European Larch or Tamarack. A cone bearing tree with light green needles which drop in the Fall. 6 to 7 ft. .... | 2.00 |
| <b>Linden</b> (Tilia). Also called Basswood. Large leaves.   |      |
| 8 to 10 ft. ....   | 2.00 |
| <b>Cordata.</b> Small leaved European, much used in planting to Park-ways and City streets.  |      |
| 8 to 10 ft. ....   | 3.00 |
| 10 to 12 ft. ....  | 4.00 |
| <b>Mountain Ash</b> (Sorbus aucuparia). A good compact tree bearing large bunches of orange red berries in Fall.                       |      |
| 5 to 6 ft. ....  | 1.00 |
| <b>Oak</b> (Quercus). The Pin Oak is most easily transplanted of the Oak family. 8 to 10 ft. ....                                      | 3.00 |
| 10 to 12 ft. ....  | 4.00 |
| <b>Poplar</b> (Populus). Fast growing trees used for quick effect.   |      |
| <b>Carolina</b> (Eugenei). Spreading branches. 8 to 10 ft. ....  | 1.00 |
| <b>Lombardy</b> (Italica). A narrow spire-like tree of very rapid growth, often used for screens and along drives.                     |      |
| 6 to 8 ft. ....  | .75  |
| 8 to 10 ft. ....   | 1.00 |
| 10 to 12 ft. ....  | 1.50 |
| <b>Willow</b> (Salix). Golden barked. Fast growing willow with yellow bark.  |      |
| 3 to 4 ft. ....  | .50  |
| <b>Wisconsin weeping.</b> A graceful tree.   |      |
| 3 to 4 ft. ....  | .50  |
| 6 to 8 ft. ....  | 1.00 |

|   |      |
|---|------|
| <b>Niobe.</b> A golden barked weeping willow. |      |
| 3 to 4 ft. ....                               | .50  |
| 6 to 8 ft. ....                               | 1.50 |
| 8 to 10 ft. ....                              | 2.50 |

### FLOWERING AND ORNAMENTAL TREES

The flowering trees are very beautiful when used as specimens on the lawn or in a shrubby border. Some are often grown in shrub form, particularly the Dogwoods, and are used as a background for the smaller shrubs. Most of the trees in this group range in size from ten to twenty five feet when fully grown.

25 lb. bag .....\$1.00

50 lb. bag ..... 1.75

100 lb. bag ..... 3.00

## **CONDITIONS OF SALE**

**Terms are Cash**, excepting by special agreement.

**A Discount of 5%** is allowed for cash with order.

**We give no warranty**, expressed or implied, as to quality, description or productiveness of any nursery stock that we sell. The only guarantee we make is that our stock is alive at time of shipment and true to name. No complaints will be considered that are not made within ten days after receipt of order. Any stock ordered from this list, found untrue to name, will be cheerfully replaced at the first favorable opportunity for planting, after it has been found not as ordered.

**Time for Planting.** All hardy trees and plants of any description can be safely transplanted in the Spring as soon as frost leaves the ground, and usually as late as about June 1st. Also during the period beginning September 15th and continuing until the ground becomes frozen. Evergreen trees and shrubs can further be safely handled during August.

We respectfully invite correspondence pertaining to problems of interest to planters.
